

HFL Building Solutions

Solutions for today's modern and technically complex buildings.

Introduction

HFL Building Solutions provides the experience and technical expertise to deliver efficient and cost-effective management, operational and maintenance solutions for today's modern and technically complex buildings.

We believe that building owners and managers expect the optimum level of performance from the services in their buildings to provide the best environmental comfort for all occupants. To achieve this, it is essential that the building services are expertly operated and maintained - employing a managed programme of preventative maintenance.

HFL Building Solutions recognises that customers' needs vary according to their business activities and market conditions. We therefore provide bespoke service levels to meet those customer requirements.

Ensuring the best people look after your needs...

Our customer care approach means that we ensure our employees have the expertise needed to operate and maintain the most complex of buildings. We therefore employ staff with a broad range of technical skills that are continually reviewed and enhanced through a commitment to apprentice training and personal development.

HFL Building Solutions has developed its resources of mobile multi-skilled and specialist technicians so that the appropriate level of technical response can be made to all planned maintenance and emergency situations.

Technicians are dedicated to particular contracts so that they can become familiar with the installed plant and services and are able to understand individual customer requirements.

Each technician operates from a vehicle equipped with the necessary instruments, tools and equipment to effect maintenance and repairs with the least disruption and down time.

**A team dedicated
to ensuring you get
the best solution...**

Providing a bespoke service

HFL Building Solutions understands the complex and time pressured world within which many of our customers operate, as such we have put in place service levels that ensure the most efficient and cost effective approach to buildings' maintenance.

Customers have access to a 24-hour emergency call-out facility. All calls are logged from start to finish, the call-out is continually monitored and the Customer is updated at key stages throughout the work.

HFL Building Solutions uses specialist service providers for specific tasks, which are monitored through a performance measurement procedure.

With experience in the delivery of technical solutions, HFL Building solutions supplies HVCA installation services to a varied client base, from small businesses through to large PLC's.

Each client receives the same personal dedicated service, built on close customer liaison and individual attention to detail.

HFL Building Solutions is not associated to any one equipment manufacturer thereby enabling us to select the correct systems for a particular project ensuring optimum efficiency and economy.

A team dedicated to ensuring you get the best solution...

At HFL Building Solutions, we recognise the importance of communication throughout the projects from concept to completion. We therefore provide much more than simply another installation. We work with our clients to understand the exact requirements of the market place, your organisation and the style and objectives of your company.
